reference lacks at least the disclosure of a detector which terminates the etching of the wafer when the difference in the pressure is greater than a predetermined value, as specifically recited in claim 20. Thus, the applied art lacks at least the disclosure of one of the features of claim 20. For at least these reasons, applicant respectfully submits that claim 20, and the claims that depend are patentable over the applied art. Allowance is earnestly solicited.

If any points remain in issue that may best be resolved through a personal or telephonic interview, the Examiner is respectfully requested to contact the undersigned at the telephone number listed below.

In the event that there are any outstanding matters remaining in the present application, the Examiner is invited to contact William S. Francois, Esq. (Reg. No. 38,456) at (610) 375-3513 to discuss these matters.
